MOODLING

With Your Bloomers

What?

Moodle is an Open Source (FREE!) Course Management System (CMS), also known as a Learning Management System (LMS) or a Virtual Learning Environment (VLE). It has become very popular among educators around the world as a tool for creating online dynamic course sites for their students.

Bloom's Revised Digital Taxonomy is an update to Bloom's revised taxonomy to account for the new behaviors emerging as technology advances and becomes more ubiquitous. It is based on the work of Andrew Church in 2001.

Web 2.0 refers to a perceived second generation of web development and design, that aims to facilitate communication, secure information sharing, interoperability, and collaboration on the World Wide Web.

MOODLING

With Your Bloomers

Why?

“I believe that to prepare our students for the future, we must prepare them for change, teach them to question and think, to adapt and modify, to sift and sort. - Andrew Church

1. The new NC Essential Standards are based on Bloom's Revised Taxonomy.
2. 21st Century Employees need to be able to communicate and collaborate.
3. Our students are already interacting socially on the web.
4. The majority of these tools are **free** and **fun!**

MOODLING

With Your Bloomers

When?

Anytime! Not limited to the classroom schedule.

Where?

Anywhere! Not limited to the classroom walls.

Who?

Anyone! Not limited to the classroom teacher.
